

Anthem Institute is an accredited institution that is a part of a family of 21 schools located across the country. Our goal is simple. We offer a highly-instructional, real world education that qualifies you for rewarding, long-term careers. Anthem Institute is dedicated to teaching students what they need to know, based on real world-training and qualifications that top employers look for.

We currently have six programs at our school in Parsippany. The six programs offered at the Parsippany location are:

- CAD/Drafting Technology
- Computer Networking & Security
- Graphic Design & Animation
- Massage Therapy
- Medical Assistant
- Medical Billing & Coding

Students in the Medical Assistant and Medical Billing and Coding are required to complete an externship at a medical facility in order to complete their program. This portion is designed to give them real hands-on experience, as we emphasize the importance of a well-rounded graduate. Extern candidates are available year-round. This is also a great opportunity for employers to work with a candidate before hiring.

Massage Therapy students work in our on-campus clinic after they have completed their classroom courses. The clinic is open to the public for the small fee of \$25.00.

The technical programs do not have externship/internship as a requirement for graduation but we do encourage our students to seek internships. Real world experience is very useful to students, particularly those with little work experience.

We currently have campuses located in New Jersey, New York, Pennsylvania, and throughout the United States. The three Anthem Institute campuses in New Jersey are located in North Brunswick, Jersey City and Cherry Hill. Program offerings vary from campus to campus. Our staff at each campus will be able to assist you in obtaining candidates for externships or work/study opportunities.

Each campus also offers continuous placement assistance for our graduates. It is the belief of Anthem Institute to assist our graduates in finding employment in their respective fields of study, and we pursue this aggressively. We have students completing their respective programs throughout the year, and can assist you in your staffing needs.

For more information, please contact Robert Case, Director of Graduate Placement, at (973)630-4916, or [rcase@anthem.edu](mailto:rcase@anthem.edu).
